Preface

The 21st Century is an era for knowledge-based societies. Many developed countries around the world are expanding their R&D budgets and increasing the role played by research support organizations.

In line with the current administration's policy, the National Research Foundation of Korea (NRF), the nation's biggest research support organization, was established to work side by side with world-leading countries.

The NRF is currently laying the groundwork for a more abundant life for all humankind and a brighter future for Korea as a developed nation. In order to help inspire researchers and improve the quality of life for all, the NRF supports creative research that demonstrates the spirit of challenge.

Furthermore, the NRF will act as a systematic and specialized research support organization that will comprehensively promote a wide range of research.

This program aims to expand Korea's scientific cooperation in response to increasingly diversified requests from home and abroad, particularly in the area of human resources.

Fellows are expected to take advantage of such opportunities as shared friendships and mutual exchange of ideas with Korean scientists. It is hoped that this program will contribute to mutual understanding between participating countries.

I. Overview

1. Purpose

The Postdoctoral Fellowship Program for Foreign Researchers is designed to provide promising young foreign researchers with opportunities to improve their knowledge and experience in the fields of science and technology, while also conducting research activities in Korean universities and research laboratories.

Under the program, the National Research Foundation of Korea (NRF) grants fellowships to foreign researchers to carry out work/research as a staff member in an approved work program relevant to his/her specialization under Korean advisors.
